*Reportable intercepts for PK126C and PK127C were revised slightly by increasing the minimum g/t*m in order to eliminate smaller and lower grade intervals. One additional "including" intercept was added to the table in PK127C

**PK 137C was lost near the bottom of the mineralized zone due to poor ground conditions higher in the hole. PK137CA was wedged off the same hole from above the mineralized zone using NQ tools and was completed through the mineralized zone immediately adjacent to PK137C.
